Make idea & Make Money

INTRODUCTION

This web application is provide for big marketing companies and users, both sections has more benefits accessing through this website. Many companies and users have many requirements and ideas in their mind that all spread and share through this site. This web application is typically a forum, any organization or persons have register in this site.

OBJECTIVE

The main scope of this web application is normal users can interact with big companies in the world without any restrictions. This software has ability for twist career of companies and users.

Software can maintaining the records of the company and user registration Details, companies can share or post their requirements as a thread , users can share their ideas and suggestions depended on the other companies and other clients requests.

The another scope of this web application is any restrictions are not consist for member registrations like education qualification, minimum working experience etc...so any level users can join and share their ideas through an online and make a money different gifts. Big companies reputations etc...

Next is the web developer provide a start-up platform here for users? Because some time after this site is registered by many art makers so many organizations ready to invest money for starting a small start-up through gathering this talented art makers

Modules

Here modules are division based into main process and concepts

Registration

Registration option for clients (Company & users)

Login

Here who is Register in the site he /she can enter to the log in page.

Thread

This is the main part of the this site, because here we can upload any idea like new concepts, current marketing news, new start up plans etc. if companies need any new requirements then make a thread related to that then others can replay and suggest new ideas it is help to companies sense the taste of normal users and they can find new different type talented persons, typically this site is help to companies way of advertising.

Mailing

This is the part of the secure communication here any users can share their ideas with high securities

Forum Teams

Here developer provide a stage to users gathering, share and work as a team .So each forum has an administrator , super moderator , moderator and normal users....so we provide a recruitment to this position and select users to the this positions bases on their experience and some other criteria.

Existing system

Mobile phone company xiaomi provide this type of site .But it's only for mobile users.

Propose System

Proposed System has more features than existing system .that is here many type of organization has to be register so make more opportunities for users. Its help to make a better growth in companies and users.
